Course Description:

Therapeutic taping has been used for over 100 years to improve function, reduce pain and prevent injury. This lab based course is an all-inclusive course for orthopedic, neurologic, pediatric and lymphedema conditions. Emphasis will be on clinical reasoning and critical thinking vs. cookbook approach. Billing and reimbursement included.

Course Objectives:

Upon completion of this session, participant will be able to:

- Use differential diagnosis techniques to select appropriate patients for taping interventions relative to indications and contraindications
- Select and apply appropriate taping techniques based on patient presentation and functional limitations
- Assess efficacy of taping application objectively
- Discuss current evidence with regard to utilizing taping techniques
- Objectively document techniques applied for billing and reimbursement
